Broadcast Solutions Finland Delivered Virtual Studio for Streamteam Nordic

Bingen (Germany), 17 January 2018

Broadcast Solutions Finland Oy delivered a virtual studio for its Finnish customer Streamteam Nordic Oy in the end of last year and the new virtual studio was taken into use already on 1st January 2018.

Streamteam uses the brand-new virtual studio mainly to produce Finnish Horse Racing and TotoTV for its customer, Finnish gaming company Veikkaus Oy.

Juha Koskela, CEO at Streamteam, comments on the new virtual studio: "Broadcast Solutions Finland specified and delivered all needed components for the virtual studio. We are extremely satisfied with their service as well as Zero Density's virtual studio software. Installation was easy, and everything runs smoothly from the start."

The virtual studio brings a modern and dynamic outlook for TotoTV, which delivers horse racing programs every Monday, Wednesday and Saturday. The virtual studio desk and the anchors are physically located in the studio in Helsinki; all other elements are virtually inserted into the studio environment, e.g. videos from two different race tracks in the background during Magic Monday races.

Main technological components of the virtual studio are Zero Density virtual studio software, Mo-Sys tracking system, SAM Kula production switcher and Slomo.tv replay servers.
