ViBox6 Slomo
Powerful & Cost Effective Slomo Solution

The Affordable Solution for Slow Motion Replays

The ViBox technology solution for replays has been updated to offer the most affordable and powerful solution with the ViBox6 Slomo. The system has been streamlined to 6 channels for optimal performance in a cost effective bundle for 4 records and 2 playback configurations.

The ViBox6 Slomo design builds around the instinctive touch screen design interface and adds the option of a gaming interface controller. The intuitive, natural interface allows a new and larger base of operators to learn the craft of broadcast production and replays.

The ViBox6 Slomo features include
- Multiple camera slomo and playback
- 4 camera recording
- Integration of replay, variable speed control, highlights and graphics
- Interface with external live graphics over NDI protocol
- Touchscreen control UI with option of dedicated next generation controller

The ViBox6 Slomo incorporates many user defined settings to allow the operation to be customized as needed. This includes automation options related to graphics, replay sequences and others.

Technical Specifications

Video
- 6 x HD SDI (4 IN – 2 OUT)
- 1 Genlock Input (CB / BB / Tri-Level)
- 1 LTC Input
- VC-3 120 / 145 Mbps

Audio
- Embedded audio: 16 tracks per video channel (input or output)
- Recording: up to 16 tracks (uncompressed)

Graphics
- Internal CG with 3 graphic layers: score / timer + 2 user-selectable overlays
- Optional IP integration with external CG (NDI Protocol)

Storage
- Internal RAID Storage: 4 x 3 TB (200 hours of HD recording)
- USB3 connectors for import / export from / to external storage

Network
- 2 x Gigabit Ethernet port for connection to local area network

Physical
- Main unit: 4 RU Chassis, 60 cm / 23.6" depth
- XBox controller

Power
- Main unit: 110 / 230 V 800 W
