VAR-Vans

VAR, ready to roll

A VAR Van combines Video Operations Room (VOR) and Referee Review Area (RRA) technologies in a fully self-contained mobile unit. Designed for leagues, federations and tournaments that require maximum flexibility, it delivers professional officiating support directly at the venue — independent, reliable and ready for matchday.

Officiating that comes to you

VAR Vans are designed for competitions that require professional VAR operations without investing in permanent centralized infrastructure. Combining mobility, operational independence and proven officiating workflows, they provide a complete matchday environment that can be deployed wherever and whenever it is needed.

Key Benefits

- Independent from permanent VAR facilities
- Minimal reliance on stadium infrastructure
- Fast deployment and venue-to-venue flexibility
- Integrated referee communication and RRA workflows
- Support for Stadium TV and VAR announcement integration
- Available on EV-based vehicle platforms

Technical Considerations

- Fleet management and logistics are required
- Higher travel and operational costs
- Technical resources remain distributed across venues
- Lower scalability compared to centralized models

Operational Independence

- Independent from permanent VAR facilities
- Reduced dependency on stadium infrastructure
- Integrated referee communication and RRA workflows
- Consistent operations across multiple venues

Technical Versatility

- Support for SDI, NDI and IP-based workflows
- Stadium TV and VAR announcement integration
- Compatible with a wide range of officiating technologies
- Flexible system configurations for different competitions

Mobility & Sustainable Deployment

- Rapid deployment between venues
- Ideal for tournaments and temporary competitions
- Available on EV-based vehicle platforms
- Reduced infrastructure investments at stadiums
